Certifications

Java (Basic) > HackerRank

SQL (Basic) > HackerRank

Prompt Engineer > Masai School

Professional Summary

A highly motivated Backend Developer with expertise in Java, Spring Boot, Hibernate, RESTful services, Python, Flask and databases. Excels in building projects individually and as part of a team. Committed to delivering reliable backend solutions while staying current with emerging technologies and industry trends.

Work Experience

Nolan Edutech

SDE Intern | Nov 2023 - Apr 2024

- Developed backend features for an event management system to facilitate seamless organization and participant engagement.
- Contributed to backend development of a fitness mobile app, ensuring robust functionality and performance.
- Conducted code reviews and collaborated with front-end developers to ensure seamless integration.

Projects

Safar |

Safar is a web-based Java application. It is mainly designed to simplify the booking process for bus travel.

Features :

- Authentication on the User & Admin side
- Perform CRUD Operations on the admin side to manage bus routes, reservations, and user feedback
- Seat booking and payment functionalities

Areas of responsibility :

- User, admin registration and authentication.
- Implemented admin functionalities for CRUD operations for users and activity management.
- Created front-end payment features with OTP verification and CRUD operations for routes and users.

Tech Stack : Java | Spring boot | MySQL | HTML | CSS | JS

A collaborative project built by a team of 5 members.

Project-Prism |

Project Prism is a user-friendly Portfolio Management Application. It helps the manager to manage projects, tasks and resources.

Features :

- Admin authentication for security.
- CRUD operation for projects, tasks and resources.
- Assign project to managers and tracking project details.

Tech Stack : Python | Flask | React | MangoDB

An individual project built in 5 days.
